# Purchase Process

## Purchase

Field Code	Description
TaskID	Unique Purchase task ID
Company	Company name
Line1	Company Address Line1
Line2	Company Address Line2
Line3	Company Address Line3
ShipToDifferentCompany	Shipping Company if user choose Different Company
ShipToDifferentContact	Shipping Contact if user choose Different Company
ShippingAddressLine1	Company Shipping Address Line1
ShippingAddressLine2	Company Shipping Address Line2
ShippingLine1	Shipping Address Line 1
ShippingLine2	Shipping Address Line 2
ShippingCitySuburb	Shipping Address City/Suburb
ShippingStateProvince	Shipping Address State/Province
ShippingZipPostCode	Shipping Address Zip/Postcode
ShippingCountry	Shipping Address Country
VendorLine1	Vendor Address Line 1
VendorLine2	Vendor Address Line 2
VendorCitySuburb	Vendor Address City/Suburb
VendorStateProvince	Vendor Address State/Province
VendorZipPostCode	Vendor Address Zip/Postcode
VendorCountry	Vendor Address Country
CustomerPhone	For Drop-shipped purchase tasks, this field holds Phone field value from originating sale task (Customer Phone)
CustomerReference	For Drop-shipped purchase tasks, this field holds Customer Reference field value from originating sale task
MyName	Company Contact Name
MyPhone	Company Phone
MyFax	Company Fax
MyEmail	Company Email
MyWebsite	Company Website
SupplierName	Supplier Name
SupplierFax	Supplier Fax
SupplierEmail	Supplier Email
SupplierWebsite	Supplier Website
SupplierContact	Supplier Contact
SupplierPhone	Supplier Phone
SupplierCurrency	Supplier Currency
TaxNumber	Supplier Tax Number
Terms	Payment terms
SupplierAddressLine1	Supplier Billing Address Line1
SupplierAddressLine2	Supplier Billing Address Line2
SupplierReference	Supplier Reference (e.g. Invoice Number)

<b>Field Code</b>	<b>Description</b>
InvoiceDate	Invoice Date
InvoiceDueDate	Invoice Due Date
RequiredBy	Shipment Required By
Currency	Organisation's Base Currency
Rate	Currency conversion rate
Tax	Total Tax for document
PONumber	Purchase Order Number
Date	Date of the document
Location	Warehouse Location
PurchaseOrderMemo	Purchase Order Memo. Additional information you would like to print on the Purchase Order
Note	Internal note from the task header
CreditNoteNumber	Credit Note Number
CreditNoteDate	Credit Note Date
POLinesBeforeTax	Total Lines In Purchase Order Table
POLinesTax	Purchase order total Tax
POLinesTotal	Purchase order total amount
POAdditionalCostLinesBeforeTax	Purchase order Additional Costs Before Tax
POAdditionalCostLinesTax	Purchase order Additional Cost Tax
POAdditionalCostLinesTotal	Purchase order Additional Cost Total including tax
POBeforeTax	Total purchase order lines and additional costs
POTax	Total purchase order taxes
POTotal	Total purchase order including taxes and additional costs
InvoiceLinesBeforeTax	Invoice Lines Before Tax
InvoiceLinesTax	Invoice Lines Tax
InvoiceLinesTotal	Invoice Lines Total
CreditNoteLinesBeforeTax	Credit Note Lines Before Tax
CreditNoteLinesTax	Credit Note Lines Tax
CreditNoteLinesTotal	Credit Note Lines Total
InvoiceAdditionalCostLinesBeforeTax	Invoice Additional Cost Lines Before Tax
InvoiceAdditionalCostLinesTax	Invoice Additional Cost Lines Tax
InvoiceAdditionalCostLinesTotal	Invoice Additional Cost Lines Total
CreditNoteAdditionalCostLinesBeforeTax	Credit Note Additional Cost Lines Before Tax
CreditNoteAdditionalCostLinesTax	Credit Note Additional Cost Lines Tax
CreditNoteAdditionalCostLinesTotal	Credit Note Additional Cost Lines Total
InvoiceLinesAndCostsBeforeTax	Invoice Lines And Costs Before Tax
InvoiceLinesAndCostsTaxTotal	Invoice Lines And Costs Tax Total
TotalPrepayments	Total of Prepayments
InvoiceBalance	Invoice Balance is total costs minus payments
CreditNoteBalance	Credit Note Balance

TotalPayments	Total Payments
TotalRefunds	Total Refunds
POTotalDiscount	Total Discount amount on PO

<b>Field Code</b>	<b>Description</b>
InvoiceLinesTotalDiscount	Total Discount amount on Purchase Invoice
CreditNoteLinesTotalDiscount	Total Discount amount on PO Return
DatePrinted	Date Printed
DueOrCredit	Due Or Credit for this invoice.
LinesInAdditionalCost	Total Lines In Additional Cost table
LinesInPayment	Total Lines In Payment table
LinesInReceived	Total Lines In Received table
LinesInPrepayment	Total Lines In Prepayment table
LinesInPO	Total Lines In purchase order Table
LinesInPOAdditionalCost	Total Lines In purchase order Additional Cost table
LinesInInvoice	total Lines In Invoice table
LinesInCreditNote	Total Lines In Credit Note table
LinesInCreditNoteAdditionalCosts	Total Lines In Credit Note Additional Costs table
LinesInRefund	Total Lines In Refund table
CreditNoteLinesAndCostTax	Credit Note Lines And Cost Tax
CreditNoteLinesAndCostBeforeTax	Credit Note Lines And Cost Before Tax
POTotalQuantity	Total purchase order quantities
StockReceivedTotalQuantity	Total stock received quantities
UnstockTotalQuantity	Total unstock quantities
InvoiceTotalQuantity	Total quantities invoiced
CreditNoteTotalQuantity	Total quantities on credit note
AdditionalAttribute1	Supplier Additional Attribute 1
AdditionalAttribute2	Supplier Additional Attribute 2
AdditionalAttribute3	Supplier Additional Attribute 3
AdditionalAttribute4	Supplier Additional Attribute 4
AdditionalAttribute5	Supplier Additional Attribute 5
AdditionalAttribute6	Supplier Additional Attribute 6
AdditionalAttribute7	Supplier Additional Attribute 7
AdditionalAttribute8	Supplier Additional Attribute 8
AdditionalAttribute9	Supplier Additional Attribute 9
AdditionalAttribute10	Supplier Additional Attribute 10
Carrier	Supplier Default Carrier
PurchaseAttribute1	Purchase Additional Attribute 1
PurchaseAttribute2	Purchase Additional Attribute 2
PurchaseAttribute3	Purchase Additional Attribute 3
PurchaseAttribute4	Purchase Additional Attribute 4
PurchaseAttribute5	Purchase Additional Attribute 5
PurchaseAttribute6	Purchase Additional Attribute 6
PurchaseAttribute7	Purchase Additional Attribute 7
PurchaseAttribute8	Purchase Additional Attribute 8
PurchaseAttribute9	Purchase Additional Attribute 9
PurchaseAttribute10	Purchase Additional Attribute 10

## POLines

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number
ItemCode	SKU
ItemDescription	Product name
ShortDescription	Product Short Description
Category	Product Category
Brand	Product Brand
SupplierItemCode	Supplier code
SupplierItemName	Supplier name for the product
Unit	Unit of measure
Comment	Line comment
Quantity	Quantity to buy
Price	Sell price
Discount	Discount %
Tax	Tax if applicable
Total	Total for line item
Barcode	Barcode
Description	Product description
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
StockLocator	StockLocator. Specifies location of the item in warehouse
ProductImage	ProductImage. Use this mail merge to display image «Image:ProductImage»
WeightUnits	Weight Unit
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity

## POAdditionalCosts

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number
Description	Description of additional charges
Reference	Custom line comment
Amount	Unit Price
Quantity	Quantity
Discount	Discount %

Field Code	Description
TaxRule	Tax rule applied
Tax	Tax
Total	Total for line item

## Prepayments

Field Code	Description
ID	Line number
PaymentMethod	Name of account used for payment
Reference	Reference
Amount	Amount of prepayment
DatePaid	Date when prepayment was made

## StockReceived

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number
ItemCode	SKU
ItemDescription	Product name
ShortDescription	Product Short Description
Category	Product Category
Brand	Product Brand
SupplierItemCode	Supplier specific SKU
Unit	Unit of measure
Quantity	Quantity received
Location	Location
DateReceived	Date item received
Received	Flag indicating that item has been received
BatchOrSerialNumber	Batch or Serial number
Description	Product description
Barcode	Barcode
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
StockLocator	Stock Locator. Specifies location of the item in warehouse
ExpiryDate	Item expiry date
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
PriceTier1	Price tier 1

Field Code	Description
PriceTier2	Price tier 2
PriceTier3	Price tier 3
PriceTier4	Price tier 4
PriceTier5	Price tier 5
PriceTier6	Price tier 6
PriceTier7	Price tier 7
PriceTier8	Price tier 8
PriceTier9	Price tier 9
PriceTier10	Price tier 10
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity

### ReceivingNoteByProducts

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number
ItemCode	SKU
ItemDescription	Product name
ShortDescription	Product Short Description
Category	Product Category
Brand	Product Brand
SupplierItemCode	Supplier specific SKU
Unit	Unit of measure
Quantity	Quantity received
Location	Location
DateReceived	Date item received
Received	Flag indicating that item has been received
BatchOrSerialNumber	Batch or Serial number
Description	Product description
Barcode	Barcode
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
StockLocator	Stock Locator. Specifies location of the item in warehouse
ExpiryDate	Item expiry date
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»

<b>Field Code</b>	<b>Description</b>
PriceTier1	Price tier 1
PriceTier2	Price tier 2
PriceTier3	Price tier 3
PriceTier4	Price tier 4
PriceTier5	Price tier 5
PriceTier6	Price tier 6
PriceTier7	Price tier 7
PriceTier8	Price tier 8
PriceTier9	Price tier 9
PriceTier10	Price tier 10
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity

### ProductLabelsBatch

The same content as in StockReceived except that for each line with X quantity in StockReceived there are X lines in ProductlabelsBatch table

<b>Field Code</b>	<b>Description</b>
TaskID	Unique Purchase task ID
ID	Line number
ItemCode	SKU
ItemDescription	Product name
ShortDescription	Product Short Description
Category	Product Category
Brand	Product Brand
SupplierItemCode	Supplier specific SKU
Unit	Unit of measure
Quantity	Quantity received
Location	Location
DateReceived	Date item received
Received	Flag indicating that item has been received
BatchOrSerialNumber	Batch or Serial number
Description	Product description
Barcode	Barcode
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10

Field Code	Description
StockLocator	Stock Locator. Specifies location of the item in warehouse
ExpiryDate	Item expiry date
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
PriceTier1	Price tier 1
PriceTier2	Price tier 2
PriceTier3	Price tier 3
PriceTier4	Price tier 4
PriceTier5	Price tier 5
PriceTier6	Price tier 6
PriceTier7	Price tier 7
PriceTier8	Price tier 8
PriceTier9	Price tier 9
PriceTier10	Price tier 10
WeightUnits	Weight Unit
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity

## InvoiceLines

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number
ItemCode	SKU
ItemDescription	Product name
ShortDescription	Product Short Description
Category	Product Category
Brand	Product Brand
SupplierItemCode	Supplier specific SKU
Unit	Unit of measure
Comment	Line comment
Quantity	Quantity received
Price	Line item price
Discount	Discount applied
Tax	Tax if applicable
Total	Total for line item
Type	ACCPAY
Barcode	Barcode
Description	Product description
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6

Field Code	Description
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
StockLocator	Stock Locator. Specifies location of the item in warehouse
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
BatchorSerialNumbers	Comma-delimited list of all batches or serial numbers for every item included on the invoice
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity

### InvoiceAdditionalCosts

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number
Description	Description of additional charges
Reference	Custom line comment
Amount	Unit Price
Quantity	Quantity
Discount	Discount %
Date	Date charges occurred
TaxRule	Tax rule applied
Tax	Tax
Total	Total for line item

### InvoicePayments

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number
PaymentMethod	Name of account used for payment
Reference	Reference like receipt id
Amount	Amount of payment
DatePaid	Date when payment was made

### CreditNoteLines

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line Number
ItemCode	SKU
ItemDescription	Product name
ShortDescription	Product Short Description
Category	Product Category
Brand	Product Brand
SupplierItemCode	Supplier specific SKU
Unit	Unit of measure

Field Code	Description
Comment	Line comment
Quantity	Quantity on credit note
Price	Price
Discount	Discount %
Tax	Tax for line item
Total	Total for line item
Type	ACCPAYCREDIT
Barcode	Barcode
Description	Product description
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
StockLocator	Stock Locator. Specifies location of the item in warehouse
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
BatchorSerialNumbers	Comma-delimited list of all batches or serial numbers for every item included on the credit note
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity

### CreditNoteAdditionalCosts

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number
Description	Description of additional charges
Reference	Customer line comment
Amount	Unit Price
Quantity	Quantity
Discount	Discount %
Date	Date charges made
TaxRule	Tax rule applied
Tax	Tax amount
Total	Total for line item

### CreditNotePayments

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number

Field Code	Description
PaymentMethod	Name of the account payment made from
Reference	Reference like receipt id
Amount	Amount
DatePaid	Date payment made

## Unstock

Field Code	Description
TaskID	Unique Purchase task ID
ID	Line number
ItemCode	SKU
ItemDescription	Product name
ShortDescription	Product Short Description
Category	Product Category
Brand	Product Brand
SupplierItemCode	Supplier specific SKU
Unit	Unit of measure
Quantity	Quantity received
Location	Location
DateReceived	Date item received
Unstock	Flag indicating that item has been unstocked
BatchOrSerialNumber	Batch or Serial number
Description	Product description
Barcode	Barcode
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
StockLocator	Stock Locator. Specifies location of the item in warehouse
ExpiryDate	Item expiry date
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
PriceTier1	Price tier 1
PriceTier2	Price tier 2
PriceTier3	Price tier 3
PriceTier4	Price tier 4
PriceTier5	Price tier 5
PriceTier6	Price tier 6
PriceTier7	Price tier 7
PriceTier8	Price tier 8

<b>Field Code</b>	<b>Description</b>
PriceTier9	Price tier 9
PriceTier10	Price tier 10
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity

### OrderTaxDetails

<b>Field Code</b>	<b>Description</b>
Name	Display Name of the tax component
Amount	Value of the tax allocated to this component
Percent	Tax rate

### InvoiceTaxDetails

<b>Field Code</b>	<b>Description</b>
Name	Display Name of the tax component
Amount	Value of the tax allocated to this component
Percent	Tax rate

### CreditNoteTaxDetails

<b>Field Code</b>	<b>Description</b>
Name	Display Name of the tax component
Amount	Value of the tax allocated to this component
Percent	Tax rate

## Sale Process

### Sale

Field Code	Description
TaskID	Unique Sale task ID
Company	Company name
Line1	Company Address Line1
Line2	Company Address Line2
Line3	Company Address Line3
ShipToDifferentCompany	Shipping Company if user choose Different Company
ShipToDifferentContact	Shipping Contact if user choose Different Company
ShippingAddressLine1	Full Shipping Address Part 1 (ShippingLine1 + Shipping Line2)
ShippingAddressLine2	Shipping Address Part 2 ( )
ShippingLine1	Shipping Address Line 1
ShippingLine2	Shipping Address Line 2
ShippingCitySuburb	Shipping Address City/Suburb
ShippingStateProvince	Shipping Address State/Province
ShippingZipPostCode	Shipping Address Zip/Postcode
ShippingCountry	Shipping Address Country
BillingLine1	Billing Address Line 1
BillingLine2	Billing Address Line 2
BillingCitySuburb	Billing Address City/Suburb
BillingStateProvince	Billing Address State/Province
BillingZipPostCode	Billing Address Zip/Postcode
BillingCountry	Billing Address Country
MyName	Company Contact Name
MyPhone	Company Phone
MyFax	Company Fax
MyEmail	Company Email
MyWebsite	Company Website
CustomerName	Customer Name
CustomerFax	Customer Fax
CustomerEmail	Customer Email
CustomerWebsite	Customer Website
CustomerContact	Customer Contact
CustomerPhone	Customer Phone
CustomerJobTitle	Customer contact's job title
CustomerMobilePhone	Customer contact's mobile phone number
Terms	Payment terms
BillingAddressLine1	Customer Billing Address Line1
BillingAddressLine2	Customer Billing Address Line2
CustomerReference	Customer Reference (e.g. Purchase Order Number)
TaxNumber	Customer Tax Number
InvoiceNumber	Invoice Number
InvoiceDate	Invoice Date

<b>Field Code</b>	<b>Description</b>
InvoiceDueDate	Invoice Due Date
RequiredBy	Shipment Required By
Currency	Customer Currency
Tax	TaxRule Name for document
SONumber	Sale Order Number
Fulfilmentnumber	Fulfilment number associated/Linked with Invoice
Date	Date of the document
Location	Warehouse Location
QuoteMemo	Quote Memo. Additional information you would like to print on the quote
InvoiceMemo	Invoice Memo. Additional information you would like to print on the invoice
CreditNoteMemo	Credit Note Memo. Additional information you would like to print on the credit note
OrderMemo	Sale Order Memo. Additional information you would like to print on the sale order
Note	Internal note from the task header
CreditNoteNumber	Credit Note Number
Rate	Currency conversion rate at the time when goods were received.
SalesRepresentative	Name of Sales Representative
SalesRepresentativePhone	Phone number of Sales Representative
SalesRepresentativeFax	Fax number of Sales Representative
SalesRepresentativeEmail	Email address of Sales Representative
Name	Name price tier used for the document
CreditNoteDate	Credit Note Date
QuoteLinesBeforeTax	Quote Lines Before Tax
QuoteLinesTax	Quote Lines Tax
QuoteLinesTotal	Quote Lines Total

SaleAttribute1	Sale Additional Attribute 1
SaleAttribute2	Sale Additional Attribute 2
SaleAttribute3	Sale Additional Attribute 3
SaleAttribute4	Sale Additional Attribute 4
SaleAttribute5	Sale Additional Attribute 5
SaleAttribute6	Sale Additional Attribute 6
SaleAttribute7	Sale Additional Attribute 7
SaleAttribute8	Sale Additional Attribute 8
SaleAttribute9	Sale Additional Attribute 9
SaleAttribute10	Sale Additional Attribute 10

## QuoteLines

Field Code	Description
TaskID	Unique sale task id
ID	Line number
ProductCode	SKU
ProductName	Name of the product
ShortDescription	Product Short Description

<b>Field Code</b>	<b>Description</b>
Unit	Units sold
Quantity	Quantity sold
Price	Sale Price
PriceDiscounted	Sell price with all discounts applied
Discount	Discount applied
Tax	Line item Tax
Total	Line item Total
Barcode	Item barcode
Description	Product description
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
StockLocator	Stock Locator. Specifies location of the item in warehouse
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
Comment	Additional information for line item.
WeightUnits	Weight Unit
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity
TaxPercentage	Tax percentage applied to this line
TaxRule	Name of the tax rule applied to this line
Category	Product Category
Brand	Product Brand
Option1	Product Family variant option 1 value
Option2	Product Family variant option 2 value
Option3	Product Family variant option 3 value

### QuoteAdditionalCharges

<b>Field Code</b>	<b>Description</b>
TaskID	Unique sale task id
ID	Line number
Description	Description of additional charges
Comment	Additional information for line item.
Amount	Unit Cost
Quantity	Quantity
Discount	Discount %
Tax	Tax
Total	Total for line item

Field Code	Description
TaxRule	Tax rule applied
TaxPercentage	Tax percentage applied to this line
ServiceDescription	Description field of the service

## Prepayments

Field Code	Description
TaskID	Unique sale task id
ID	Line number
PaymentMethod	Name of account used for payment
Reference	Reference like receipt ID
Amount	Amount of payment
DatePaid	Date when payment was made
AccountCode	Account used for payment

## Order

Field Code	Description
TaskID	Unique sale task ID
ID	Line number
ProductCode	SKU
ProductName	Product name
ShortDescription	Product Short Description
Unit	Unit of measure
Quantity	Quantity to sell
Price	Sell price
PriceDiscounted	Sell price with all discounts applied
Discount	Discount %
Tax	Tax if applicable
Total	Total for line item
Barcode	Barcode

### ExpandedPickGroup

Can be used as parent table for ExpandedPick to show Kit components grouped by kit name/sku.

Field Code	Description
KitSKU	Kit SKU. For not auto-assembled products = "Items"
KitName	Kit Name. For not auto-assembled products = "Items"
KitQuantity	Quantity of assembled kits

### ExpandedPick

Has the same content as Pick table, except that auto-assembled products are replaced with their components.

Field Code	Description
TaskID	Unique sale task ID
ID	Line number
ProductCode	SKU

<b>Field Code</b>	<b>Description</b>
ProductName	Product name
ShortDescription	Product Short Description
Unit	Unit of measure
Quantity	Quantity to pick
Location	Location
BatchOrSerialNumber	Batch or Serial number
Barcode	Barcode
AdditionalAttribute1	Product Additional Attribute 1

PriceTier9	Price tier 9
PriceTier10	Price tier 10
Comment	Comment from Sale Order line
WeightUnits	Weight Unit
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity
Category	Product Category
Brand	Product Brand
KitSKU	Kit SKU. For not auto-assembled products = "Items"
KitName	Kit Name. For not auto-assembled products = "Items"
Option1	Product Family variant option 1 value
Option2	Product Family variant option 2 value
Option3	Product Family variant option 3 value

## Pack

Field Code	Description
TaskID	Unique sale task ID
ID	Line number
ProductCode	SKU
ProductName	Product name
ShortDescription	Product Short Description
Unit	Unit of measure
Quantity	Quantity to pick
BoxNumber	Box number where item packed
BatchSN	Batch or Serial number
Barcode	Barcode
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
Description	Product description
ExpiryDate	Item expiry date
StockLocator	Stock Locator. Specifies location of the item in warehouse
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
Price	Item price
WeightUnits	Weight Unit
ItemWeight	Product Weight per 1 quantity
TotalLineWeight	ItemWeight * Quantity
Comment	Comment field from related sale order lines
Category	Product Category
Brand	Product Brand
Option1	Product Family variant option 1 value
Option2	Product Family variant option 2 value
Option3	Product Family variant option 3 value

## BoxContent

Field Code	Description
TaskID	Unique sale task ID
BoxNumber	Box number
ProductCode	SKU
ProductName	Product name
ShortDescription	Product Short Description

<b>Field Code</b>	<b>Description</b>
Unit	Unit of measure
Quantity	Quantity packed
BatchOrSerialNumber	Batch or Serial number
ExpiryDate	Item expiry date
Barcode	Barcode
Category	Product Category
Brand	Product Brand

## Ship

<b>Field Code</b>	<b>Description</b>
TaskID	Unique sale task ID
ID	Line Number
ShipmentDate	Date when goods were shipped
Carrier	Carrier name
Boxes	comma delimited list of boxes shipped
Status	Shipped/Not Shipped
TrackingNumber	Carrier tracking number

## InvoiceLines

<b>Field Code</b>	<b>Description</b>
TaskID	Unique sale task ID
ID	Line Number

## Locations

This table can wrap following 4 tables to group picked/packed items by location

Field Code	Description
Location	Name of the location of Picked and Packed products

## PickCombinedNoBatches

This tables holds picked products grouped without batch/serial number information

Field Code	Description
ProductCode	SKU
ProductName	Product name
ShortDescription	Product Short Description
Unit	Unit of measure
Quantity	Quantity
Location	Location picked
Bin	Bin name
Barcode	Product Barcode
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
Description	Product description
Stock Locator	Stock locator information of from the product
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
WeightUnits	Weight unit
ItemWeight	Product Weight per 1 quantity
TotalWeight	ItemWeight * Quantity
Category	Product Category
Brand	Product Brand

## PickCombinedWithBatches

This tables holds picked products with batch/serial number information

Field Code	Description
ProductCode	SKU
ProductName	Product name
ShortDescription	Product Short Description
Unit	Unit of measure
Quantity	Quantity
Location	Location picked
BatchSN	Batch/Serial Number
Expiry Date	Expiry date of the batch
Bin	Bin name
Barcode	Product Barcode
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
Description	Product description
Stock Locator	Stock locator information of from the product
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
WeightUnits	Weight unit
ItemWeight	Product Weight per 1 quantity
TotalWeight	ItemWeight * Quantity
Category	Product Category
Brand	Product Brand

## PackCombinedNoBatches

This tables holds packed products grouped without batch/serial number information

Field Code	Description
Box	Sale Order # + Box number
ProductCode	SKU
ProductName	Product name
ShortDescription	Product Short Description
Unit	Unit of measure
Quantity	Quantity
Location	Location picked
Bin	Bin name
Barcode	Product Barcode

ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
WeightUnits	Weight unit
ItemWeight	Product Weight per 1 quantity
TotalWeight	ItemWeight * Quantity
Category	Product Category
Brand	Product Brand

## PackCombinedWithBatches

This tables holds packed products with batch/serial number information

Field Code	Description
Box	Sale Order # + Box number
ProductCode	SKU
ProductName	Product name
ShortDescription	Product Short Description
Unit	Unit of measure
Quantity	Quantity
Location	Location picked
BatchSN	Batch/Serial Number

Field Code	Description
Expiry Date	Expiry date of the batch
Bin	Bin name
Barcode	Product Barcode
AdditionalAttribute1	Product Additional Attribute 1
AdditionalAttribute2	Product Additional Attribute 2
AdditionalAttribute3	Product Additional Attribute 3
AdditionalAttribute4	Product Additional Attribute 4
AdditionalAttribute5	Product Additional Attribute 5
AdditionalAttribute6	Product Additional Attribute 6
AdditionalAttribute7	Product Additional Attribute 7
AdditionalAttribute8	Product Additional Attribute 8
AdditionalAttribute9	Product Additional Attribute 9
AdditionalAttribute10	Product Additional Attribute 10
Description	Product description
Stock Locator	Stock locator information of from the product
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
WeightUnits	Weight unit
ItemWeight	Product Weight per 1 quantity
TotalWeight	ItemWeight * Quantity
Category	Product Category
Brand	Product Brand

## ShippingCombined

Holds information about shipping lines from all selected sale tasks + general sale information

Field Code	Description
Boxes	Number of Boxes
Carrier	Carrier Name
TrackingNumber	Tracking Number
ShipmentDate	Shipment Date
CustomerName	Customer Name
CustomerFax	Customer Fax
CustomerEmail	Customer Email
CustomerWebsite	Customer Website
CustomerContact	Customer Contact
CustomerPhone	Customer Phone
Terms	Payment terms
CustomerReference	Customer Reference (e.g. Purchase Order Number)
TaxNumber	Customer Tax Number
InvoiceStatus	Invoice Status
InvoiceNumber	Invoice Number
InvoiceDate	Invoice Date
InvoiceDueDate	Invoice Due Date
RequiredBy	Shipment Required By

<b>Field Code</b>	<b>Description</b>
Currency	Customer Currency
SONumber	Sale Order Number
Date	Order Date
ShippingAddressLine1	Combined Shipment Address Line 1
ShippingAddressLine2	Combined Shipment Address Line 2
ShippingLine1	Shipment Address Line 1
ShippingLine2	Shipment Address Line 2
ShippingCitySuburb	Shipment Address City
ShippingStateProvince	Shipment Address State
ShippingZipPostCode	Shipment Address Post Code/Zip
ShippingCountry	Shipment Address Country
BillingAddressLine1	Combined Billing Address Line 1
BillingAddressLine2	Combined Billing Address Line 2
BillingLine1	Billing Address Line 1
BillingLine2	Billing Address Line 2
BillingCitySuburb	Billing Address City
BillingStateProvince	Billing Address State
BillingZipPostCode	Billing Address Post Code/Zip
BillingCountry	Billing Address Country
QuoteMemo	Quote Memo. Additional information you would like to print on the quote
InvoiceMemo	Invoice Memo. Additional information you would like to print on the invoice
OrderMemo	Sale Order Memo. Additional information you would like to print on the sale order
Note	Internal note from the task header
SalesRepresentative	Name of Sales Representative
SalesRepresentativePhone	Phone number of Sales Representative
SalesRepresentativeFax	Fax number of Sales Representative
SalesRepresentativeEmail	Email address of Sales Representative
Status	Shipment status
CustomerAttribute1	Custom Attribute 1 value assigned to a customer
CustomerAttribute2	Custom Attribute 2 value assigned to a customer
CustomerAttribute3	Custom Attribute 3 value assigned to a customer
CustomerAttribute4	Custom Attribute 4 value assigned to a customer
CustomerAttribute5	Custom Attribute 5 value assigned to a customer
CustomerAttribute6	Custom Attribute 6 value assigned to a customer
CustomerAttribute7	Custom Attribute 7 value assigned to a customer
CustomerAttribute8	Custom Attribute 8 value assigned to a customer
CustomerAttribute9	Custom Attribute 9 value assigned to a customer
CustomerAttribute10	Custom Attribute 10 value assigned to a customer

## Customer Statements printing

Data in these tables are only for templates related to customer statements printing from View All Customers form.

### Activity – Customer Activity statement data

Field Code	Description
DocDate	Effective transaction date
Activity	Document type
DueDate	Document due date
Reference	Document Number
InvoiceAmount	Invoiced/Credited amount
Payments	Payment/Refund amount
Balance	Outstanding balance

### Outstanding – Customer outstanding transactions data

Field Code	Description
DocDate	Effective transaction date
Activity	Document type
DueDate	Document due date
Reference	Document Number
InvoiceAmount	Invoiced/Credited amount
Payments	Payment/Refund amount
Balance	Outstanding balance

### Common – common data for customer statements

Field Code	Description
Company	DEAR Organisation name
CustomerName	Name of the customer
OpeningBalance	Customer opening balance on the From date
StatementDate	Statement Date
FromDate	Date From for activity statement
ToDate	Date To (inclusive) for activity statement
ActivityCount	Number of Lines in Activity
OutstandingCount	Number of Lines in Outstanding
ActivityDueAmount	Activity Due Amount
ActivityPaidAmount	Activity Paid Amount
OutstandingDueAmount	Outstanding Due Amount
OutstandingPaidAmount	Outstanding Paid Amount

## Inventory Process

### InventoryTask

Field Code	Description
Date	Date task created
StocktakeNumber	Sequential stocktake number
Account	Expense account
Status	Status of the task
Reference	Document Reference Number
Location	Location where stocktake is performed
DatePrinted	Current Date
Company	Company name

### InventoryAdjustment

Field Code	Description
ID	Line Number
ProductName	Product Name
ProductCode	SKU
Unit	Unit of measure
Location	Warehouse location
Barcode	Product barcode
WeightPerUnit	Product weight per Unit
Comments	Comments
QuantityOnHand	Quantity on hand at the time of adjustment created
Adjustment	adjustment quantity
Variance	difference between stock on hand and adjustment
BatchOrSerialNumber	batch or serial number if applicable
StockLocator	Stock Locator. Specifies location of the item in warehouse
ExpiryDate	Item expiry date
Category	Product Category
Brand	Brand
StockLocator	Stock locator
AdditionalAttribute1	Product additional attribute 1 value
AdditionalAttribute2	Product additional attribute 2 value
AdditionalAttribute3	Product additional attribute 3 value
AdditionalAttribute4	Product additional attribute 4 value
AdditionalAttribute5	Product additional attribute 5 value
AdditionalAttribute6	Product additional attribute 6 value
AdditionalAttribute7	Product additional attribute 7 value
AdditionalAttribute8	Product additional attribute 8 value
AdditionalAttribute9	Product additional attribute 9 value
AdditionalAttribute10	Product additional attribute 10 value

## StockTransferTask

Field Code	Description
Date	Date when transfers was created
From	Source Location
FromLine1	Source Location Address Line1
FromLine2	Source Location Address Line2
FromCitySuburb	Source Location City
FromStateProvince	Source Location State/Province
FromZipPostCode	Source Location Zip/Post Code
FromCountry	Source Location Country
To	Target Location
ToLine1	Target Location Address Line1
ToLine2	Target Location Address Line2
ToCitySuburb	Target Location City
ToStateProvince	Target Location State/Province
ToZipPostCode	Target Location Zip/Post Code
ToCountry	Target Location Country
DateReceived	Date Received
DateSent	Date Sent
InTransitAccount	In Transit Account
Status	Status of the transfer task
Reference	Document Reference Number
Number	Task number
User	User who initiated transfer
DatePrinted	Date the form is printed
Company	Company name
EffectiveDate	Transfer effective date

## StockTransferDetail

Field Code	Description
ID	Line Number
ProductName	Product name
ProductCode	SKU
Unit	Unit of measure
Comments	Comments for line item
QuantityOnHand	Quantity on hand
QuantityAvailable	Available Quantity
TransferQuantity	Transfer Quantity
BatchOrSerialNumber	Batch or serial number when applicable
StockLocator	Stock Locator. Specifies Default location of the item as specified on the product
FromStockLocator	Stock Locator for source warehouse location of the product
ToStockLocator	Stock Locator for target warehouse location of the product
ExpiryDate	Item expiry date
FromLocation	Location: bin where the stock is coming from

Field Code	Description
ToLocation	Location: bin where the stock is going to
Barcode	Product barcode
WeightPerUnit	Product weight Per Unit
Category	Product Category
Brand	Product Brand
AdditionalAttribute1	Additional attribute 1 value of the product
AdditionalAttribute2	Additional attribute 2 value of the product
AdditionalAttribute3	Additional attribute 3 value of the product
AdditionalAttribute4	Additional attribute 4 value of the product
AdditionalAttribute5	Additional attribute 5 value of the product
AdditionalAttribute6	Additional attribute 6 value of the product
AdditionalAttribute7	Additional attribute 7 value of the product
AdditionalAttribute8	Additional attribute 8 value of the product
AdditionalAttribute9	Additional attribute 9 value of the product
AdditionalAttribute10	Additional attribute 10 value of the product

### FinishedGoodsTask

Field Code	Description
AssemblyNumber	Assembly Number
Status	Status of assembly task
LastUpdatedBy	User made the most recent change
Location	Warehouse location
Quantity	Quantity to assemble
ProductCode	SKU
Name	Product Name
Barcode	Product barcode
WeightPerUnit	Product weight Per Unit
Weight	Total weight for Line
Company	Company name
Date	Date assembly was created
DatePrinted	Date report is printed
WIPDate	Work in Progress date
CompletionDate	Completion date
Account	Expense Account code / Finished Good account code
WIPAccount	WIP Account code
Unit	Unit of measure
BatchOrSerialNumber	Batch or Serial number if applicable
TotalCost	Cost of the finished goods
StockLocator	Stock Locator. Specifies location of the item in warehouse
ExpiryDate	Item expiry date
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
Bin	Name of the bin assembled product is placed to. Can be empty.

Field Code	Description
Notes	Multiline notes
AdditionalAttribute1	Additional attribute 1 value of the product
AdditionalAttribute2	Additional attribute 2 value of the product
AdditionalAttribute3	Additional attribute 3 value of the product
AdditionalAttribute4	Additional attribute 4 value of the product
AdditionalAttribute5	Additional attribute 5 value of the product
AdditionalAttribute6	Additional attribute 6 value of the product
AdditionalAttribute7	Additional attribute 7 value of the product
AdditionalAttribute8	Additional attribute 8 value of the product
AdditionalAttribute9	Additional attribute 9 value of the product
AdditionalAttribute10	Additional attribute 10 value of the product
Description	Manufactured product description

### FinishedGoodsComponents

Field Code	Description
ID	Line Number
TotalQuantity	Total quantity to use in assembly
WastageQuantity	Assumed wastage (quantity)
WastagePercent	Assumed wastage (percent)
ProductCode	SKU
Name	Product name
ShortDescription	Product Short Description
Cost	Cost of 1 quantity
Unit	Units of measure
BatchOrSerialNumber	Batch or Serial number if applicable
TotalCost	Cost of the component for TotalQuantity
Barcode	Product barcode
WeightPerUnit	Product weight Per Unit
Weight	Total weight for Line
StockLocator	Stock Locator. Specifies location of the item in warehouse
ExpiryDate	Item expiry date
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
Bin	Name of the bin finished goods component is taken from. Can be empty.
AdditionalAttribute1	Product additional attribute 1
AdditionalAttribute2	Product additional attribute 2
AdditionalAttribute3	Product additional attribute 3
AdditionalAttribute4	Product additional attribute 4
AdditionalAttribute5	Product additional attribute 5
AdditionalAttribute6	Product additional attribute 6
AdditionalAttribute7	Product additional attribute 7
AdditionalAttribute8	Product additional attribute 8
AdditionalAttribute9	Product additional attribute 9

Field Code	Description
AdditionalAttribute10	Product additional attribute 10
Category	Product category
Brand	Product brand
Description	Component product description

### FinishedGoodsComponentsBatch

Field Code	Description
ID	Line Number
ProductCode	SKU
Name	Product name
ShortDescription	Product Short Description
Unit	Units of measure
BatchOrSerialNumber	Batch or Serial number if applicable
StockLocator	Stock Locator. Specifies location of the item in warehouse
ExpiryDate	Item expiry date
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
Barcode	Product barcode
WeightPerUnit	Product weight Per Unit
Weight	Total weight for Line
Bin	Name of the bin finished goods component is taken from. Can be empty.
AdditionalAttribute1	Product additional attribute 1
AdditionalAttribute2	Product additional attribute 2
AdditionalAttribute3	Product additional attribute 3
AdditionalAttribute4	Product additional attribute 4
AdditionalAttribute5	Product additional attribute 5
AdditionalAttribute6	Product additional attribute 6
AdditionalAttribute7	Product additional attribute 7
AdditionalAttribute8	Product additional attribute 8
AdditionalAttribute9	Product additional attribute 9
AdditionalAttribute10	Product additional attribute 10
Category	Product category
Brand	Product brand
Description	Component product description

### FinishedGoodsOrder

Field Code	Description
ID	Line Number
Quantity	Quantity to use
TotalQuantity	Quantity to assemble
WastageQuantity	Assumed wastage (quantity)
WastagePercent	Assumed wastage (percent)
ProductCode	SKU

<b>Field Code</b>	<b>Description</b>
Name	Product name
ShortDescription	Product Short Description
Barcode	Product barcode
WeightPerUnit	Product weight Per Unit
Weight	Total weight for Line
Cost	Cost of 1 quantity of the component
Unit	Units of measure
TotalCost	Cost of TotalQuantity of the component
StockLocator	Stock Locator. Specifies location of the item in warehouse
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
Category	Product Category
Brand	Product Brand
AdditionalAttribute1	Product additional attribute 1 value
AdditionalAttribute2	Product additional attribute 2 value
AdditionalAttribute3	Product additional attribute 3 value
AdditionalAttribute4	Product additional attribute 4 value
AdditionalAttribute5	Product additional attribute 5 value
AdditionalAttribute6	Product additional attribute 6 value
AdditionalAttribute7	Product additional attribute 7 value
AdditionalAttribute8	Product additional attribute 8 value
AdditionalAttribute9	Product additional attribute 9 value
AdditionalAttribute10	Product additional attribute 10 value
Description	Product description

### **InventoryAdjustmentLabel**

<b>Field Code</b>	<b>Description</b>
Location	Warehouse location
Unit	Units of measure
Quantity	Quantity
ProductCode	SKU
Name	Product name
Company	Company name
DatePrinted	Date report is printed
BatchOrSerialNumber	Batch or Serial number if applicable
ExpiryDate	Item expiry date
Comments	User entered comments
StockLocator	Stock Locator. Specifies location of the item in warehouse
Barcode	Item Barcode
WeightPerUnit	Product weight
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
Price1	Price tier 1
Price2	Price tier 2

Field Code	Description
Price3	Price tier 3
Price4	Price tier 4
Price5	Price tier 5
Price6	Price tier 6
Price7	Price tier 7
Price8	Price tier 8
Price9	Price tier 9
Price10	Price tier 10
Category	Product Category
Brand	Product Brand
AdditionalAttribute1	Product additional attribute 1 value
AdditionalAttribute2	Product additional attribute 2 value
AdditionalAttribute3	Product additional attribute 3 value
AdditionalAttribute4	Product additional attribute 4 value
AdditionalAttribute5	Product additional attribute 5 value
AdditionalAttribute6	Product additional attribute 6 value
AdditionalAttribute7	Product additional attribute 7 value
AdditionalAttribute8	Product additional attribute 8 value
AdditionalAttribute9	Product additional attribute 9 value
AdditionalAttribute10	Product additional attribute 10 value

### ProductLabelsBatch

The same content as in InventoryAdjustmentLabel except that for each line with X quantity in InventoryAdjustmentLabel there are X lines in ProductLabelsBatch table

Field Code	Description
Location	Warehouse location
Unit	Units of measure
Quantity	Quantity
ProductCode	SKU
Name	Product name
Company	Company name
DatePrinted	Date report is printed
BatchOrSerialNumber	Batch or Serial number if applicable
ExpiryDate	Item expiry date
Comments	User entered comments
StockLocator	Stock Locator. Specifies location of the item in warehouse
Barcode	Item Barcode
WeightPerUnit	Product weight Per Unit
Weight	Total weight for Line
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»
Price1	Price tier 1
Price2	Price tier 2

<b>Field Code</b>	<b>Description</b>
Price3	Price tier 3
Price4	Price tier 4
Price5	Price tier 5
Price6	Price tier 6
Price7	Price tier 7
Price8	Price tier 8
Price9	Price tier 9
Price10	Price tier 10
Category	Product category
Brand	Product Brand
AdditionalAttribute1	Product additional attribute 1 value
AdditionalAttribute2	Product additional attribute 2 value
AdditionalAttribute3	Product additional attribute 3 value
AdditionalAttribute4	Product additional attribute 4 value
AdditionalAttribute5	Product additional attribute 5 value
AdditionalAttribute6	Product additional attribute 6 value
AdditionalAttribute7	Product additional attribute 7 value
AdditionalAttribute8	Product additional attribute 8 value
AdditionalAttribute9	Product additional attribute 9 value
AdditionalAttribute10	Product additional attribute 10 value

## Price List

### Header

<b>Field Code</b>	<b>Description</b>
Company	Company name
PriceTierName1	Name for price tier 1
PriceTierName2	Name for price tier 2
PriceTierName3	Name for price tier 3
PriceTierName4	Name for price tier 4
PriceTierName5	Name for price tier 5
PriceTierName6	Name for price tier 6
PriceTierName7	Name for price tier 7
PriceTierName8	Name for price tier 8
PriceTierName9	Name for price tier 9
PriceTierName10	Name for price tier 10
DatePrinted	Date when price list is generated
SelectedCategory	Category selected as a filter
SelectedBrand	Brand selected as a filter
SelectedTag	Product tag selected as a filter

## Products

Field Code	Description
ID	Line Number
ProductCode	Product code
ProductName	Product name
ShortDescription	Product Short Description
Category	Category
Barcode	Barcode
Description	Product description
CustomField1	Value of custom field 1
CustomField2	Value of custom field 2
CustomField3	Value of custom field 3
CustomField4	Value of custom field 4
CustomField5	Value of custom field 5
CustomField6	Value of custom field 6
CustomField7	Value of custom field 7
CustomField8	Value of custom field 8
CustomField9	Value of custom field 9
CustomField10	Value of custom field 10
StockLocator	Stock Locator. Specifies location of the item in warehouse
Option1	Name of the option 1 (For product families only)
Option2	Name of the option 2 (For product families only)
Option3	Name of the option 3 (For product families only)
Price1	Price tier 1
Price2	Price tier 2
Price3	Price tier 3
Price4	Price tier 4
Price5	Price tier 5
Price6	Price tier 6
Price7	Price tier 7
Price8	Price tier 8
Price9	Price tier 9
Price10	Price tier 10
UOM	Unit of measure
Tags	Comma delimited product tags
Available	Available stock (includes allocated)
OnHand	Stock on hand (doesn't include allocated)
ProductImage	Product Image. Use this mail merge to display image «Image:ProductImage»

# Disassembly

## Disassembly

Field Code	Description
Date	Date when disassembly task was created
DisassemblyNumber	Unique number of the disassembly task
Status	Status of the task
Location	Location where disassembly takes place
ProductCode	SKU of disassembled product
Name	Name of disassembled product
Quantity	Quantity of disassembled product
WIPDate	Date when Pick in disassembly was authorised (in case of Undo it keeps original Work in Progress date)
CompletionDate	Date when disassembly result was authorised and task status changed to Completed (in case of Undo it keeps original Completion date)
DatePrinted	Date when the document is generated
Company	Company name
AssemblyInstructionURL	URL of the assembly instruction if specified for disassembled product
StockLocator	Stock Locator field of disassembled product
Barcode	Barcode of disassembled product
AdditionalAttribute1	Additional Attribute 1 of disassembled product
AdditionalAttribute2	Additional Attribute 2 of disassembled product
AdditionalAttribute3	Additional Attribute 3 of disassembled product
AdditionalAttribute4	Additional Attribute 4 of disassembled product
AdditionalAttribute5	Additional Attribute 5 of disassembled product
AdditionalAttribute6	Additional Attribute 6 of disassembled product
AdditionalAttribute7	Additional Attribute 7 of disassembled product
AdditionalAttribute8	Additional Attribute 8 of disassembled product
AdditionalAttribute9	Additional Attribute 9 of disassembled product
AdditionalAttribute10	Additional Attribute 10 of disassembled product
ProductImage	Default image of disassembled product. Use this mail merge to display image «Image:ProductImage»
ComponentsTotalCost	Total cost of components produced as a result of disassembly (excluding cost of Labour and Overheads)
ServicesTotalAmount	Total amount of Labour and Overheads associated with disassembly
TotalCost	ComponentsTotalCost + ServicesTotalAmount
TotalComponentLines	Number of components produced as a result of disassembly
TotalComponentsQuantity	Quantity of components produced as a result of disassembly
Unit	Unit of measure
TotalServicesLines	Number of services used in disassembly

## DisassemblyPicking

Field Code	Description
Quantity	Quantity to pick
UnitCost	Unit cost of this product batch
Cost	Quantity * UnitCost
BatchSN	Batch/Serial number
ExpiryDate	Expiry Date
ID	Line Number
StockLocator	Stock Locator field of disassembled product
Barcode	Barcode of disassembled product
AdditionalAttribute1	Additional Attribute 1 of disassembled product
AdditionalAttribute2	Additional Attribute 2 of disassembled product
AdditionalAttribute3	Additional Attribute 3 of disassembled product
AdditionalAttribute4	Additional Attribute 4 of disassembled product
AdditionalAttribute5	Additional Attribute 5 of disassembled product
AdditionalAttribute6	Additional Attribute 6 of disassembled product
AdditionalAttribute7	Additional Attribute 7 of disassembled product
AdditionalAttribute8	Additional Attribute 8 of disassembled product
AdditionalAttribute9	Additional Attribute 9 of disassembled product
AdditionalAttribute10	Additional Attribute 10 of disassembled product
Bin	Name of the bin pick line is located at. Can be empty.

## DisassemblyComponents

Field Code	Description
Quantity	Quantity produced
Cost	Cost of the whole number of units (not a unit cost)
BatchSN	Batch/Serial number
ExpiryDate	Expiry Date
ProductCode	SKU of the produced product
Name	Name of the produced product
Quantity	Quantity of produced product
StockLocator	Stock Locator field of produced product
Barcode	Barcode of produced product
AdditionalAttribute1	Additional Attribute 1 of produced product
AdditionalAttribute2	Additional Attribute 2 of produced product
AdditionalAttribute3	Additional Attribute 3 of produced product
AdditionalAttribute4	Additional Attribute 4 of produced product
AdditionalAttribute5	Additional Attribute 5 of produced product
AdditionalAttribute6	Additional Attribute 6 of produced product
AdditionalAttribute7	Additional Attribute 7 of produced product
AdditionalAttribute8	Additional Attribute 8 of produced product
AdditionalAttribute9	Additional Attribute 9 of produced product
AdditionalAttribute10	Additional Attribute 10 of produced product
PriceTier1	Price tier 1 of produced product
PriceTier2	Price tier 2 of produced product

Field Code	Description
PriceTier3	Price tier 3 of produced product
PriceTier4	Price tier 4 of produced product
PriceTier5	Price tier 5 of produced product
PriceTier6	Price tier 6 of produced product
PriceTier7	Price tier 7 of produced product
PriceTier8	Price tier 8 of produced product
PriceTier9	Price tier 9 of produced product
PriceTier10	Price tier 10 of produced product
ProductImage	Default image of produced product. Use this mail merge to display image «Image:ProductImage»
ID	Line Number
Unit	Unit of measure
Bin	Name of the bin disassembled component is placed to. Can be empty.

## DisassemblyServices

Field Code	Description
Amount	Amount of money spent on this service. It is distributed between components to calculate unit cost of produced products
ProductCode	SKU of the service
Name	Name of the service
Barcode	Barcode of service
AdditionalAttribute1	Additional Attribute 1
AdditionalAttribute2	Additional Attribute 2
AdditionalAttribute3	Additional Attribute 3
AdditionalAttribute4	Additional Attribute 4
AdditionalAttribute5	Additional Attribute 5
AdditionalAttribute6	Additional Attribute 6
AdditionalAttribute7	Additional Attribute 7
AdditionalAttribute8	Additional Attribute 8
AdditionalAttribute9	Additional Attribute 9
AdditionalAttribute10	Additional Attribute 10
PriceTier1	Price tier 1
PriceTier2	Price tier 2
PriceTier3	Price tier 3
PriceTier4	Price tier 4
PriceTier5	Price tier 5
PriceTier6	Price tier 6
PriceTier7	Price tier 7
PriceTier8	Price tier 8
PriceTier9	Price tier 9
PriceTier10	Price tier 10
ID	Line Number
Comments	User entered comments

## DisassemblyLabel

Field Code	Description
Location	Location where disassembly takes place
Unit	Unit of measure of produced product
Quantity	Quantity produced
ProductCode	SKU of produced product
Name	Name of produced product
Company	Company name
DatePrinted	Date when the document is generated
BatchOrSerialNumber	Batch/Serial number of produced product
ExpiryDate	Expiry date of produced product
Cost	Cost of produced product
StockLocator	Stock Locator field of produced product
Barcode	Barcode of produced product
AdditionalAttribute1	Additional Attribute 1 of produced product
AdditionalAttribute2	Additional Attribute 2 of produced product
AdditionalAttribute3	Additional Attribute 3 of produced product
AdditionalAttribute4	Additional Attribute 4 of produced product
AdditionalAttribute5	Additional Attribute 5 of produced product
AdditionalAttribute6	Additional Attribute 6 of produced product
AdditionalAttribute7	Additional Attribute 7 of produced product
AdditionalAttribute8	Additional Attribute 8 of produced product
AdditionalAttribute9	Additional Attribute 9 of produced product
AdditionalAttribute10	Additional Attribute 10 of produced product
PriceTier1	Price tier 1 of produced product
PriceTier2	Price tier 2 of produced product
PriceTier3	Price tier 3 of produced product
PriceTier4	Price tier 4 of produced product
PriceTier5	Price tier 5 of produced product
PriceTier6	Price tier 6 of produced product
PriceTier7	Price tier 7 of produced product
PriceTier8	Price tier 8 of produced product
PriceTier9	Price tier 9 of produced product
PriceTier10	Price tier 10 of produced product
ProductImage	Default image of produced product. Use this mail merge to display image «Image:ProductImage»
Bin	Name of the bin disassembled component is placed to. Can be empty.

## DisassemblyLabelsBatch

The same content as in DisassemblyLabel except that for each line with X quantity in DisassemblyLabel there are X lines in DisassemblyLabelsBatch table

Field Code	Description
Location	Location where disassembly takes place
Unit	Unit of measure of produced product

<b>Field Code</b>	<b>Description</b>
Quantity	Quantity produced
ProductCode	SKU of produced product
Name	Name of produced product
Company	Company name
DatePrinted	Date when the document is generated
BatchOrSerialNumber	Batch/Serial number of produced product
ExpiryDate	Expiry date of produced product
Cost	Cost of produced product
StockLocator	Stock Locator field of produced product
Barcode	Barcode of produced product
AdditionalAttribute1	Additional Attribute 1 of produced product
AdditionalAttribute2	Additional Attribute 2 of produced product
AdditionalAttribute3	Additional Attribute 3 of produced product
AdditionalAttribute4	Additional Attribute 4 of produced product
AdditionalAttribute5	Additional Attribute 5 of produced product
AdditionalAttribute6	Additional Attribute 6 of produced product
AdditionalAttribute7	Additional Attribute 7 of produced product
AdditionalAttribute8	Additional Attribute 8 of produced product
AdditionalAttribute9	Additional Attribute 9 of produced product
AdditionalAttribute10	Additional Attribute 10 of produced product
PriceTier1	Price tier 1 of produced product
PriceTier2	Price tier 2 of produced product
PriceTier3	Price tier 3 of produced product
PriceTier4	Price tier 4 of produced product
PriceTier5	Price tier 5 of produced product
PriceTier6	Price tier 6 of produced product
PriceTier7	Price tier 7 of produced product
PriceTier8	Price tier 8 of produced product
PriceTier9	Price tier 9 of produced product
PriceTier10	Price tier 10 of produced product
ProductImage	Default image of produced product. Use this mail merge to display image «Image:ProductImage»
Bin	Name of the bin disassembled component is placed to. Can be empty.

## Job Costing

### Job Costing Planned Expenses:

Includes only finished goods tasks in Status = AUTHORISED with Job costing account selected as Finished Goods account.

Used to print all "to be manufactured" goods and their components.

### Job Costing Actual Expenses:

List of Expense tasks (Finished goods, Purchase, Issue to production) allocated to a specific Milestone (happens when you invoice for these expenses via Job Costing) with details like list of purchase invoice products, finished goods components and stock issue to production (written off for a job).

Purchase Tasks should have Invoice Authorised/Paid state to be included in the actual expenses (you can invoice them through job costing anyway before that).

Finished goods and issue to production tasks should have COMPLETED status to be included in the actual expenses.

## JobCosting

Field Code	Description
StartDate	Date when Job started (user-defined)
CompletedDate	Date when Job completed (user-defined)
JobNumber	Unique Job reference
Status	Current Job status
Name	Job description
AccountCode	Job account code
AccountName	Job account name
Contact	Job contact name
DatePrinted	Date when the document is generated
Company	Company name
Comments	Comments of a job
AddressLine1	Job address line 1
AddressLine2	Job address line 2
EstimatedValue	Estimated job value
BudgetedMargin	Default margin that is applied to new sale invoices generated by a job
AdditionalAttribute1	Additional Attribute 1 of a job
AdditionalAttribute2	Additional Attribute 2 of a job
AdditionalAttribute3	Additional Attribute 3 of a job
AdditionalAttribute4	Additional Attribute 4 of a job
AdditionalAttribute5	Additional Attribute 5 of a job
AdditionalAttribute6	Additional Attribute 6 of a job
AdditionalAttribute7	Additional Attribute 7 of a job
AdditionalAttribute8	Additional Attribute 8 of a job
AdditionalAttribute9	Additional Attribute 9 of a job
AdditionalAttribute10	Additional Attribute 10 of a job
ProjectManager	Name of project manager who is responsible for a job
Phone	Job contact's phone number
Customer	Name of a Customer job is being associated with

## PlannedManufacturing

Field Code	Description
AssemblyNumber	Unique identifier of Finished Goods task with Authorised status
ItemDescription	Name of a product being produced
SKU	SKU of a product being produced
Quantity	Quantity of a product being produced
Cost	Estimated cost of a product being produced
Barcode	Barcode of a product being produced
AdditionalAttribute1	Additional Attribute 1 of a product being produced
AdditionalAttribute2	Additional Attribute 2 of a product being produced
AdditionalAttribute3	Additional Attribute 3 of a product being produced
AdditionalAttribute4	Additional Attribute 4 of a product being produced
AdditionalAttribute5	Additional Attribute 5 of a product being produced
AdditionalAttribute6	Additional Attribute 6 of a product being produced
AdditionalAttribute7	Additional Attribute 7 of a product being produced
AdditionalAttribute8	Additional Attribute 8 of a product being produced
AdditionalAttribute9	Additional Attribute 9 of a product being produced
AdditionalAttribute10	Additional Attribute 10 of a product being produced
Date	Date when finished goods task was created
Unit	Unit of measure of a product being produced
ID	Sequential finished goods task number in the list (from 1 onwards)

## PlannedManufacturingComponents

Field Code	Description
ItemDescription	Name of component used to produce finished goods product
SKU	SKU of component used to produce finished goods product
Quantity	Quantity of component used to produce finished goods product
Cost	Average Cost/Service cost of component used to produce finished goods product
Barcode	Barcode of component used to produce finished goods product
AdditionalAttribute1	Additional Attribute 1 of component used to produce finished goods product
AdditionalAttribute2	Additional Attribute 2 of component used to produce finished goods product
AdditionalAttribute3	Additional Attribute 3 of component used to produce finished goods product
AdditionalAttribute4	Additional Attribute 4 of component used to produce finished goods product
AdditionalAttribute5	Additional Attribute 5 of component used to produce finished goods product
AdditionalAttribute6	Additional Attribute 6 of component used to produce finished goods product
AdditionalAttribute7	Additional Attribute 7 of component used to produce finished goods product
AdditionalAttribute8	Additional Attribute 8 of component used to produce finished goods product
AdditionalAttribute9	Additional Attribute 9 of component used to produce finished goods product
AdditionalAttribute10	Additional Attribute 10 of component used to produce finished goods product
Unit	Unit of measure of component used to produce finished goods product
ID	Sequential product component number in the list (from 1 onwards)

## ActualExpenses

Field Code	Description
TaskNumber	Unique identifier of Expense task associated with the job
ItemDescription	Name of a product being produced (only for finished goods tasks)
SKU	SKU of a product being produced (only for finished goods tasks)
Quantity	Quantity of a products in expense task
ExpenseAmount	Actual total amount of Expense task associated with the job
Barcode	Barcode of a product produced (only for finished goods tasks)
AdditionalAttribute1	Additional Attribute 1 of a product produced (only for finished goods tasks)
AdditionalAttribute2	Additional Attribute 2 of a product produced (only for finished goods tasks)
AdditionalAttribute3	Additional Attribute 3 of a product produced (only for finished goods tasks)
AdditionalAttribute4	Additional Attribute 4 of a product produced (only for finished goods tasks)
AdditionalAttribute5	Additional Attribute 5 of a product produced (only for finished goods tasks)
AdditionalAttribute6	Additional Attribute 6 of a product produced (only for finished goods tasks)
AdditionalAttribute7	Additional Attribute 7 of a product produced (only for finished goods tasks)
AdditionalAttribute8	Additional Attribute 8 of a product produced (only for finished goods tasks)
AdditionalAttribute9	Additional Attribute 9 of a product produced (only for finished goods tasks)
AdditionalAttribute10	Additional Attribute 10 of a product produced (only for finished goods tasks)
Date	Date when finished goods task/Issue to production task was created or Invoice date of purchase task
Unit	Unit of measure of a product produced (only for finished goods tasks)
ID	Sequential expense task number in the list (from 1 onwards)

## ActualExpenseComponents

Field Code	Description
ItemDescription	Name of product in Expense task / component used to produce finished goods product
SKU	SKU of product in Expense task / component used to produce finished goods product
TotalQuantity	Total Quantity of product in Expense task / component used to produce finished goods product
ExpenseAmount	Actual expense associated with product in Expense task / component used to produce finished goods product
Barcode	Barcode of product in Expense task / component used to produce finished goods product
AdditionalAttribute1	Additional Attribute 1 of product in Expense task / component used to produce finished goods product
AdditionalAttribute2	Additional Attribute 2 of product in Expense task / component used to produce finished goods product
AdditionalAttribute3	Additional Attribute 3 of product in Expense task / component used to produce finished goods product
AdditionalAttribute4	Additional Attribute 4 of product in Expense task / component used to produce finished goods product
AdditionalAttribute5	Additional Attribute 5 of product in Expense task / component used to produce finished goods product
AdditionalAttribute6	Additional Attribute 6 of product in Expense task / component used to produce finished goods product
AdditionalAttribute7	Additional Attribute 7 of product in Expense task / component used to produce finished goods product

Field Code	Description
AdditionalAttribute8	Additional Attribute 8 of product in Expense task / component used to produce finished goods product
AdditionalAttribute9	Additional Attribute 9 of product in Expense task / component used to produce finished goods product
AdditionalAttribute10	Additional Attribute 10 of product in Expense task / component used to produce finished goods product
Unit	Unit of measure of product in Expense task / component used to produce finished goods product
ID	Sequential product number in the list (from 1 onwards)

## Product Specification

### Product

Field Code	Description
ProductCode	Product SKU
Name	Product name
ShortDescription	Product Short Description
Category	Product category
Type	"Stock" or "Service"
Company	Company name
DatePrinted	Date when the document is generated
CostingMethod	Product costing method
Length	Product length dimension value
Width	Product width dimension value
Height	Product height dimension value
DimensionUnits	Dimension Unit of measure
Weight	Product weight
UnitofMeasure	Product unit of measure
Barcode	Product Barcode value
MinimumBeforeReorder	Product stock level below which Reorder function becomes active for this product
ReorderQuantity	Quantity of the product to reorder when it's available quantity falls below Minimum Before Reorder level. If 0 is specified then Product is not included in reorder. Has no effect on Reorder Backordered stock function
DefaultLocation	Product location by default
PriceTier1Name	Name of Price tier 1 as defined in General Settings
PriceTier2Name	Name of Price tier 2 as defined in General Settings
PriceTier3Name	Name of Price tier 3 as defined in General Settings
PriceTier4Name	Name of Price tier 4 as defined in General Settings
PriceTier5Name	Name of Price tier 5 as defined in General Settings
PriceTier6Name	Name of Price tier 6 as defined in General Settings
PriceTier7Name	Name of Price tier 7 as defined in General Settings
PriceTier8Name	Name of Price tier 8 as defined in General Settings
PriceTier9Name	Name of Price tier 9 as defined in General Settings
PriceTier10Name	Name of Price tier 10 as defined in General Settings

<b>Field Code</b>	<b>Description</b>
Price1	Product Tier 1 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
Price2	Product Tier 2 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
Price3	Product Tier 3 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
Price4	Product Tier 4 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
Price5	Product Tier 5 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
Price6	Product Tier 6 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
Price7	Product Tier 7 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
Price8	Product Tier 8 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
Price9	Product Tier 9 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
Price10	Product Tier 10 Price. Will be 0 if no access to Prices information is granted for current user on Product page.
HasBOM	"Yes" if product has Bill of Materials, otherwise "No"
AverageCost	Product average cost
FamilyName	Product family name
Description	Product Description (multiline)
AttributeSet	Name of the product additional attribute set
AdditionalAttribute1Name	Name of the attribute 1 of the attribute set assigned to product
AdditionalAttribute2Name	Name of the attribute 2 of the attribute set assigned to product
AdditionalAttribute3Name	Name of the attribute 3 of the attribute set assigned to product
AdditionalAttribute4Name	Name of the attribute 4 of the attribute set assigned to product
AdditionalAttribute5Name	Name of the attribute 5 of the attribute set assigned to product
AdditionalAttribute6Name	Name of the attribute 6 of the attribute set assigned to product
AdditionalAttribute7Name	Name of the attribute 7 of the attribute set assigned to product
AdditionalAttribute8Name	Name of the attribute 8 of the attribute set assigned to product
AdditionalAttribute9Name	Name of the attribute 9 of the attribute set assigned to product
AdditionalAttribute10Name	Name of the attribute 10 of the attribute set assigned to product
AdditionalAttribute1	Value of the product additional attribute 1
AdditionalAttribute2	Value of the product additional attribute 2
AdditionalAttribute3	Value of the product additional attribute 3
AdditionalAttribute4	Value of the product additional attribute 4
AdditionalAttribute5	Value of the product additional attribute 5
AdditionalAttribute6	Value of the product additional attribute 6
AdditionalAttribute7	Value of the product additional attribute 7
AdditionalAttribute8	Value of the product additional attribute 8
AdditionalAttribute9	Value of the product additional attribute 9
AdditionalAttribute10	Value of the product additional attribute 10
DiscountRule	Product Discount rule name. "No Discount" if no rule is assigned
Status	"Active" or "Deprecated"
Tags	Product Tags

Field Code	Description
FamilyOption1Value	Product family option 1 value. Only filled in when Product is part of the family
FamilyOption2Value	Product family option 2 value. Only filled in when Product is part of the family
FamilyOption3Value	Product family option 3 value. Only filled in when Product is part of the family
QuantityToProduce	Specified number of units of the product that will be manufactured when specified quantities in BOM are used
StockLocator	Product stock locator
KitAutoAssembly	Kit / Auto-assembly option. "Yes" or "No".
COGSAccount	[Account Code]: [Account Name] for COGS account if selected for the product. Only for Stock type
RevenueAccount	[Account Code]: [Account Name] for Revenue account if selected for the product
ExpenseAccount	[Account Code]: [Account Name] for Expense account if selected for the product. Only for Service type.
InventoryAccount	[Account Code]: [Account Name] for Inventory account if selected for the product. Only for Stock type
DropShipMode	Product Drop Ship mode. "No Drop Ship", "Optional Drop Ship" or "Always Drop Ship"
PurchaseTax	Tax Rule used when purchasing the product
SaleTax	Tax Rule used when selling the product
AutoDisassembly	Auto-disassembly option. "Yes" or "No"
Image:ProductImage	Default product image. Assumes size of its container table cell
BOMComponentsCount	Number of lines in BOMComponents child table
BOMComponentsAverageCostTotal	Summary of AverageCostTotal field in BOMComponents child table
BOMComponentsFixedPriceTotal	Summary of FixedPriceTotal field in BOMComponents child table
BOMComponentsLatestPriceTotal	Summary of LatestPriceTotal field in BOMComponents child table
BOMServicesCount	Number of lines in BOMServices child table
BOMServicesTotal	Summary of Cost field in BOMServices child table
SuppliersCount	Number of lines in Suppliers child table
BOMAverageCostTotal	BOMComponentsAverageCostTotal + BOMServicesTotal
BOMFixedPriceTotal	BOMComponentsFixedPriceTotal + BOMServicesTotal
BOMLatestPriceTotal	BOMComponentsLatestPriceTotal + BOMServicesTotal

## BOMComponents

Field Code	Description
ProductCode	BOM component SKU
Name	BOM component name
SKU	SKU of a product being produced
Quantity	Quantity of a BOM component required to produce QuantityToProduce units of product
WastagePercent	Wastage percent of a BOM component
WastageQuantity	Quantity of a BOM component going to waste when producing QuantityToProduce units of product
CostPercentage	Percentage of the cost this BOM component received when disassembling product

Field Code	Description
AverageCostPerUnit	BOM component average cost
AverageCostTotal	Total Cost of this BOM line including wastage calculated using Average Cost
Barcode	BOM component barcode
Image:ProductImage	BOM component default image. Assumes size of its container table cell
LatestPurchasePricePerUnit	Latest purchase price of BOM Component
LatestPurchasePriceTotal	Total Cost of this BOM line including wastage calculated using Latest Purchase Price
FixedPurchasePricePerUnit	Fixed purchase price of BOM Component
FixedPurchasePriceTotal	Total Cost of this BOM line including wastage calculated using Fixed Purchase Price
HasBOM	"Yes" if BOM component has Bill of Materials, otherwise "No"
StockLocator	BOM Component stock locator
UnitOfMeasure	Unit of measure of BOM component. Quantity is expressed in these units
ID	Sequential finished goods task number in the list (from 1 onwards)

### BOMServices - Labour & Overheads

Field Code	Description
ProductCode	BOM component SKU
Name	BOM component name
Quantity	Quantity of service units used to produce finished goods product
ExpenseAccount	Expense account code + Expense account name used to allocate Labour & Overheads expenses associated with Manufacturing
Cost	Total line cost
UnitOfMeasure	Unit of measure of the service. Quantity is expressed in these units

### Suppliers

Field Code	Description
SupplierName	Name of the supplier
LatestPurchasePrice	Latest price the product was purchased with from this supplier
FixedPurchasePrice	Fixed purchase price set for this product by the supplier
SupplierSKU	Supplier product SKU
SupplierProductName	Supplier product name
URL	This product's webpage on supplier's site
DropShipSupplier	"Yes" if this supplier is marked as Drop Ship supplier, "No" otherwise

# POS

## Receipt

Field Code	Description
ReceiptNumber	Receipt #, contains register prefix, order number and register suffix
Date	Date of sale
TableStart:Customer	
CustomerName	Customer name
CustomerLoyaltyPoints	Amount of loyalty points customer has
CustomerLoyaltyPointsUsed	Amount of loyalty points spent in current sale
SaleLoyaltyPoints	Amount of loyalty points gained from sale
TotalLoyaltyPoints	Amount of loyalty points after sale
TableEnd:Customer	
OutletName	Current outlet name
RegistryName	Current register name
CheckoutProductCount	Count of unique products in sale
TableStart:CheckoutProducts	
ProductSku	SKU
ProductName	Product name
ProductShortDescription	Product Short Description
ProductBarCode	Product barcode
ProductCount	Quantity in receipt
ProductPrice	Unit Price
ProductAmount	Line Total
TableEnd:CheckoutProducts	
SubTotal	Sub-total of sale
Discount	Total discount
CalculatedTax	Tax
Total	Sale total
TableStart:Payments	
PaymentTypeName	Payment method
PaymentAmount	Payment amount
TableEnd:Payments	
Balance	Balance of sale
Received	Amount of money received
Change	Change amount
TableStart:Notes	
SalesNote	Sale note
TableEnd:Notes	

Note: There is no need to wrap all receipt body to table.
